

Students from CI May Gunter's Glacier Star class, held November 2013, were kind enough to supply us with some feedback on the class via our Student Survey.

Here are some comments from students when they were asked:

Is there something that the Certified Instructor did that you believe goes above and beyond what you expected from the workshop that you would like to point out or commend them for?

"May was great – pleasant, patient, knowledgeable. Every person can improve of course, but there is nothing I can pinpoint for May."

"She sent specific prep instructions before each of the sessions by email – very helpful in conjunction with the pattern directions."

"I feel much more confident that I can tackle any Niemeyer pattern after having a hands-on, person-centered experience. Before this class I felt overwhelmed by the amount of detail in the instructions."

"Thank you May. I love the class and learned so much! I really appreciate all the extra help as I know I was the class "slow person"."

"May is an excellent teacher and I plan to take more classes from her in the future. Thank you. Thank you. 😊"

"I felt she was knowledgeable and answered all of my questions."

"May made sure everyone understood each step and took the time to help us that were confused until we understood what we were to do."

"May is VERY accommodating in everything connected to these classes. She strives to see that everyone makes everything PERFECT. She is really a good spokeswoman for Judy Niemeyer Quilting."

"The personal attention when we missed a class and were trying to catch up was wonderful."

"I don't think I would have ever been able to do one of these patterns without the help of May."
